

TWENTY-EIGHTH YEAR

CHICAGO A HADES ON EARTH

Eighty-Seven People Killed by Heat Since the First of July.

SIX MORE HAVE BEEN DRIVEN INSANE

Six Drowned While Bathing to Escape the Sun's Sizzling Rays.

Hot Spell in St. Louis Has Lasted Thirteen Days and the Weather is Still Most Oppressive, the Record Showing Forty-Two Deaths During That Period, Besides Many Serious Prostrations—Cincinnati Adds to the Great List—Weather Authorities Give Out Encouraging Reports.

Chicago, July 10.—The fierce heat under which the greater portion of the country has suffered since the 1st of July, moderated in many localities today, and predictions from the weather bureau at Washington indicate that lower temperature will bring general relief within 24 hours.

The records of prostrations and deaths resulting from the long-continued heat in the neighborhood of 1,000 with fatalities close to 500. In addition to this, there were scores of deaths resulting indirectly from the intolerable heat, the death rate in many of the large cities showing a fearful increase over previous years. The central states suffered more severely than other sections, the heat being most deadly in Chicago, Cincinnati and St. Louis. In the number of fatalities, this city heads the list with 87 dead, Cincinnati and suburban points reporting 65 and St. Louis 42.

Throughout the south the heat was intense, but the death rate much lower than in the north.

CHICAGO'S RECORD.
One That Is Almost Too Horrid to Contemplate.

Chicago, July 10.—Eighty-seven people have died from the effects of heat since July 1. In addition six have drowned while bathing to escape the sizzling rays of the sun, six have been driven insane, and a like number have committed suicide while 247 prostrations more or less serious, have occurred.

The health department reports show a great increase in mortality in children and suffering from chronic diseases. The average number of deaths for the past three or four days has almost doubled.

ST. LOUIS RESUME.
A Siege of Thirteen Days and Prospects For More.

St. Louis, July 10.—The hot spell in St. Louis has lasted 13 days and the weather is still hot and oppressive. During this heated term 42 persons have died from sunstroke, either on the streets, in ambulances, or in the emergency hospital.

The statistics of prostrated persons who died in their own homes are not attainable. During the hot spell 157 cases of prostration classified as "severe" have been treated at the city hospitals. There is no record of those treated at their homes. During the 13 days the heat has averaged 86 degrees.

There were no deaths and few prostrations during the first five days. Today's record of the sun in St. Louis up to 8 o'clock was 95. Six of those prostrated ten are expected to die. The dead are:

Raphele Grimmer, William Koetter, William Shelby, R. D. Wright, John Anderson, Albert Robt., Mahale Brown, Mike Alister, Emilerson, Mrs. Charles Blatto, Patrick O'Donnell, Varleman Baumer, Philip Bain.

Bakers, teamsters, cooks and organ grinders form the bulk of those prostrated. The city hospital is swamped with heat cases. The emergency wards are packed.

This morning Superintendent Sutter ordered a large number of tents, which he will have placed on the hospital grounds and will transfer all the heat cases to them.

At dawn this morning the temperature was 88 degrees. At 2 o'clock this afternoon it was 91. This evening it was 96 degrees.

As yet there has been no relief from the heat. All sorts of things were promised for tonight, but they were predicted last night and the night before that, and the people have suffered and died. There are a few little feathery clouds in the sky tonight and an apology for a breeze is coming in from Kansas—where it is hotter than here—but there are no signs of a cooler storm.

Men are sultry, women are hysterical and children are covered with prickly heat from neck to heel.

CINCINNATI'S RECORD.
One of Which She Need Not Be Proud.

Cincinnati, O., July 10.—Coroner

Harris reports three fatal cases of sunstroke here during the past three days. There were not, however, a dozen fatalities for the week in Covington, Newport and other Kentucky suburbs. There were over 500 prostrations.

Today there were seven fatal cases of heat prostrations here. The dead are: Arthur Affey, Edmund Born, Carrie Selkous, Phil Leddy, Mrs. Eva Tenkert, John Stenger, Hyman Benjamin, a child 18 months old.

There are in Cincinnati hospitals 40 cases of sunstroke from sunstroke. There are also a total of 355 cases under treatment, very largely from accidents superinduced by heat. The prostrations requiring official attention today were about 25.

They usually are about five times the fatalities. The maximum heat marked by the weather bureau today was 93 at 1 p. m. and 95 at 6 p. m. The most reliable instruments on the street level showed 93 to 4 degrees higher. The mercury on the street at 2:30 o'clock tonight was 92. Thunderstorms in this vicinity cooled the air but little.

Two Deaths, Seven Prostrations.
St. Paul, Minn., July 10.—During the heated spell in this city, which ended last night, there have been reported seven prostrations and two deaths.

Great Place For a Convention.
Milwaukee, Wis., July 10.—The number of deaths in this city resulting from the intense heat of the past few days is three, with 13 prostrations. A survey of the state outside of Milwaukee, as far as reported, shows six deaths and about 20 prostrations.

Syracuse Contributes.
Syracuse, N. Y., July 10.—There have been four deaths from the heat in this city and immediate vicinity within the last two days.

Three In Philadelphia.
Philadelphia, July 10.—Since the beginning of the present heat wave, only three deaths have resulted from heat prostrations.

But Two In a Week.
Rochester, N. Y., July 10.—There were two deaths from heat this week, both today.

Seven In Buffalo.
Buffalo, N. Y., July 10.—There have been seven deaths from heat in Buffalo this week, five of them yesterday. In the past two days there have been five deaths from heat, in neighboring towns.

Thirty-two Prostrations.
Cleveland, O., July 10.—Since the beginning of the present heated term there have been reported in this city 32 prostrations, of which five proved fatal. The highest temperature reached was 97 degrees, on last Sunday.

Many Children Die.
New Orleans, July 10.—The maximum temperature recorded during the recent heated term in New Orleans, which was broken to some extent today by a breeze from the north, was 95 degrees prior thereto, and thereafter, the mercury registered above 90. The actual deaths from heat prostration during the past few days in this city were 24, particularly of children, were in part due to the heat.

Prospects Some Brighter.
Washington, July 10.—The intense heat of the past ten days in the central valleys, due in part to the stagnation of the atmosphere, has been broken by the forward movement of the trough of low pressure from Kansas to the lake regions, and by the advance of the high pressure area from the North Pacific coast to Colorado. A fall in the temperature of 20 degrees in 24 hours has been reported from Sioux City and Concordia. The area indicating the fall in temperature has advanced to the Rocky mountains, except northern Louisiana, extreme northeastern Texas and the Alabama states Sunday afternoon, giving cooler weather for several days.

Hot at Peoria.
Peoria, Ill., July 10.—Temperature at 10 o'clock this morning was 92 degrees in the shade.

Over 90 for 10 Days.
Evansville, Ind., July 10.—After an electric storm early this morning, what the thermometer shot up to 95 by 11 a. m. The sky is overcast, partially relieving the intense heat. The thermometer has not been below 90 at midday here for ten days.

Worse Near Milwaukee.
Milwaukee, Wis., July 10.—A terrific wind and rain storm struck Oak Grove last night, leveling buildings and destroying crops.

Edwards reports 105 degrees of heat. A cool wave has arrived in Milwaukee.

Slightly Broken.
Kansas City, July 10.—Northern and western Kansas were thoroughly soaked by rain last night, breaking the hot spell. An average of 88-degree weather prevails in the southwest today. Three deaths, resulting from prostrations yesterday, are reported—Mrs. Haskell, at Troy, Kan.; William Keller, at Leavenworth, and Fred Gumm, at Vineland.

Down in Tennessee.
Chattanooga, Tenn., July 10.—Since the beginning of the extremely warm weather in this section only two deaths have occurred from heat, both of these being negroes. A number of prostrations have occurred, but only that mentioned above resulted fatally.

Eight in Kansas City.
Kansas City, July 10.—Eight deaths were directly due to the extreme hot weather which has prevailed in Kansas City during the past week. Six of these occurred yesterday, the hottest day of the season, and two on Thursday. Prostrations numbered fully 60. During the entire season previous to the past week, there has been but three deaths from sunstroke. Today the weather is cool.

Without Any Warning.
Utica, N. Y., July 10.—G. P. Wilson, an ice man, was overcome by the heat yesterday and leaving his wagon, started for home. This morning he was found dead in a field where he had wandered.

Adolph Freygang, a prominent German of Dodgeville, was overcome by the heat and died a few hours later.

WITCHCRAFT IN NEW MEXICO

Young Demons Drag an Old Woman to Death.

SHOCKING STORY OF BRUTALITY

THOUGHT SHE HAD BEWITCHED A YOUNG GIRL.

Two Young Men Lassoed Her by the Neck and Feet and Set Their Horses Galloping Over the Plains—Every Vestige of Clothing Taken From the Body—The Fiends Have Disappeared.

(Special to The Herald.)
Las Vegas, N. M., July 10.—The following story of a murder, the causes of which almost surpass belief, was received here today from a reliable party arriving from near La Cima, on the Canadian river.

The murdered woman's name was

TEODORA SALAS.

Washington, D. C., July 10.—An interesting article appeared in the Washington Post a short time ago, which purported to give the prospective attitude of the silver Republicans toward the Democrats of the national organization, if the latter do not lend aid to a campaign for re-electing Senator Cannon at the expiration of his present term of office. It stated that the Democrats had been informed of a desire on the part of certain silver Republicans to have Cannon re-elected, and that since giving such information the silver Republicans have been waiting for a sign from the leaders of the Democracy by which the silver Republicans might know that they could depend on Democratic aid in the Cannon campaign. It said that unless this sign was forthcoming the silver Republicans will go off by themselves and not combine with the Democrats in 1900. The article further says that no sign has thus far appeared, save an admission by national Democratic Chairman Jones that he would be pleased to see Cannon returned.

The Herald correspondent can find absolutely no authority for any of the statements made, but has learned that no such threat has been made by the silver Republicans. The attention of Chairman Jones was called to the matter today and he positively denied making any admission of the kind reported. He said:

"I have not contemplated taking any part whatever in the local politics of any state, and will not do so. There is no truth in the statement that I have admitted a desire to see Senator Cannon re-elected. The Democrats and friends of silver in Utah will settle that contest without any interference from me or the national organization."

Teodora Salas, she was about 60 years of age, and her murderers were Antonio Lucero, aged about 15, and Teodoro Tafaya, aged 22.

It seems that Tafaya had a sister, who had been sick for some time, and could not get well, it was claimed, on account of the old woman, who was considered by the ignorant and superstitious natives of the neighborhood as a "bruja," or witch, and who exercised her power, in their opinion, over the young girl. It appears that, following the death of the girl, the old woman, and her companion, Lucero, followed the old woman to a place about three miles from San Lorenzo, where, after being frightened, they prevailed upon by the young demons to go back with them to the girl's house and cure her.

They placed her on the saddle of Lucero's horse, young Lucero mounting behind, and started.

After going a short distance Tafaya pulled his pistol and killed the old woman, who was following, remarking that he had gotten rid of one "bruja," and would get rid of the other (the old woman).

Thereupon he took a lasso over her and, starting his horse, jerked her off the horse. He then instructed Lucero to attach his lasso to her feet, and the two, starting their horses on, pulled and dragged the woman to death. Not a vestige of clothing was found on the body when discovered.

After lingering around the place for a few days the murderers disappeared. The mother of Tafaya was arrested, she having told the officers who called at her house that she had followed her son and Lucero to kill the old woman.

Triple Tragedy in Indiana.
Wichita, Kan., July 10.—News comes from Fort Gibson, I. T., of a triple tragedy enacted on a Possum creek, where many of the Cherokee freedmen who have been paid considerable sums of money by the government, are holding a picnic. In a fight following a quarrel between Luther Stewart, a young man mixed blood, Will Nava and John Connor were shot and killed, and the Stewart girl mortally wounded.

Paul Elliott, who did the shooting, escaped.

A PECULIAR ACCIDENT.

Idaho Miner's Arm Cut off By a Boulder.

(Special to The Herald.)
Boise, Ida., July 10.—"Shorty" Miller, one of the hands of the Denver company at Pearl, had the misfortune to have his right hand cut off this morning just above the wrist. He was also slightly injured on the back of the neck and his leg crushed. He and a man named Harper were working at the bottom of the Judas shaft and were preparing to come out as the end of their shift was near at hand. Just as they were rolling a large stone into the center of the shaft, preparatory to sending it up another boulder, which had become loosened about ten feet above them, fell, catching Miller's arm between it and the other rock, cutting it off as clean as though it had been done by a surgical instrument. A fragment of the rock struck Harper on the back of the head.

DISHONORABLY DISCHARGED.

Private Jacobs, of Fort Douglas, Punished For Drunkenness.

(Special to The Herald.)
Denver, Colo., July 10.—The following order was issued this morning. Private William Jacobs, Company C, Twenty-fourth Infantry, having been tried by a general court martial for continual drunkenness, was sentenced to be dishonorably discharged, to forfeit all pay and be confined for a period of six months.

IDAHO IS PARALYZED. ALL OF HER IMPORTANT LAWS ARE NULLIFIED.

Far-Reaching Effect of the Supreme Court Decision—Efforts to Secure a Re-Hearing of the Case.

(Special to The Herald.)
Boise, Ida., July 10.—The decision of the supreme court in the two law cases has paralyzed Idaho. When the news became known generally this morning it seemed to shake the people, and when they recovered a mighty howl went up to high heaven. The entire state is aroused.

F. A. Penn, the first authority in the state on Idaho legislation, in an interview, said:

"The decision nullifies all the laws of importance passed since Idaho became a state."

Very few laws passed by Idaho legislatures have been put through so as to be of any use. It can be readily understood the widespread consternation the decision has caused. County divisions and city charters, under which thousands of warrants have been issued, remedial legislation of many kinds, the anti-gambling law, and dozens of others, are said by the best of authorities to be unconstitutional under this decision, and parties opposed to various forms of legislation have already taken steps to carry their grievances to the supreme court. The decision further says that no sign has thus far appeared, save an admission by national Democratic Chairman Jones that he would be pleased to see Cannon returned.

The Herald correspondent can find absolutely no authority for any of the statements made, but has learned that no such threat has been made by the silver Republicans. The attention of Chairman Jones was called to the matter today and he positively denied making any admission of the kind reported. He said:

"I have not contemplated taking any part whatever in the local politics of any state, and will not do so. BOTH SIDES DETERMINED

Strikers and Operators Are Equally on the Alert.

MUCH QUIET WORK IS BEING DONE

Effect of the Strike On the Price of Coal.

Vigorous Campaign Against the New York and Cleveland Coal Miners Will Be Inaugurated Today—Expected Trouble Failed to Materialize, But There Is Plenty of Time For It—Miners on Strike Must Pay Rent in Advance or Be Evicted.

Pittsburg, July 10.—The week closes with the forces engaged in the miners' strike determined as ever and on the alert to secure the slightest advantage. No openly aggressive work was done today by either side, but the miners' officials had a secret meeting at which it was believed a vigorous campaign against the New York and Cleveland coal miners to be inaugurated tomorrow was decided upon. The operators apparently are doing little, and are saying less. However, their confidence in defeating the miners has not abated in the least. Still, the trouble in the Wheeling division of the Baltimore & Ohio did not come to the surface today. The miners were paid off as usual, but no trouble whatever followed.

The effect of the strike is being manifested in the price of coal. An increase of 50 cents a ton was about today when application was made for contracts and a number of Pittsburg operators not being able to work their mines are seeking to buy coal in the West Virginia field in order to reap the advantage of the advance. There has been no intimation of lawlessness as yet in this respect. Still, the coal in Allegheny county has anticipated any trouble by swearing in 500 deputies, who are in readiness for the field at a moment's notice. At this time a precaution seems like over-caution. The miners say there will be no overt acts committed during the war and all proceedings will be strictly within the law.

President Hatchford left the city quietly tonight but will return in time to accompany the men in their demonstration against the New York and Cleveland company's miners.

The miners on the Wheeling division were paid today for the two weeks ending July 1, and contrary to expectation there was no disorder at any of the company's offices. Nearly 400,000 is said to have been paid at the various mines. The men made their visit to the cashiers in a quiet and unobtrusive manner. Pittsburg, which is practically the center of the coal business in the West, was as quiet as a country village on Sunday. The practice of deducting rent and store bills was followed to a large extent at the company's offices.

At the majority of the mines it is said the men will be required to pay their month's rent in advance, whereas this is impossible, they will be required to vacate the company's houses.

There was a flurry in the coal market today. Before the strike, coal was quoted at 70 cents per ton.

After the strike, coal was quoted at 75 cents per ton. A few of the operators who were on the inside made considerable money. Some of the operators have gone to the brokers. Business in the West Virginia country, The Port Royal coal company has bought 300 cars of West Virginia coal and was selling it from \$1.00 to \$1.50.

Situation at Chicago.
Chicago, July 10.—As a result of the coal miners' strike, every pumping station and all public institutions of the city are threatened with a coal shortage, and the city is in danger of having its water supply cut off. It was discovered today that there is only two days supply of coal in the city. The various pumping stations, and a conference between Commissioner of Public Works McGowan and the leading coal dealers of the city, developed the fact that the city is in danger of having its water supply cut off.
